OBJECTIVES

1. Discuss the interaction and negative impact of behavioral disorders on various physical diseases.
2. Identify local resources to help implement integration of behavioral health concepts into physician practices.
3. Discuss the concept of medical cost offset as a result of behavioral health treatment.
4. Identify older adults who present in primary care clinics with mental health needs.
5. Facilitate referral for formal diagnostic assessment of mental health needs.
6. Conduct diagnostic assessment of mental health needs and develop treatment plan.
7. Describe how to initiate a course of treatment including prescription medication and problem-solving therapy.
8. Identify how to staff a collaborative care model.
9. Define and diagnose attention deficit hyperactivity disorder using clinical criteria.
10. Recognize the integrated community to diagnosing and treating ADHD.
11. Discuss how to improve management of ADHD.
12. Demonstrate a practical, evidence-based approach to recognizing depression in a primary care clinic.
13. Identify the methods the School Health Link of Rock Island County uses to bridge the medical practice with behavioral health.
14. Identify the referral process for mental health services at Vera French.
15. Improve the identification of behavioral health problems in the primary care setting.
16. Recognize the use of screening tools to assist in the identification of depression and other behavioral health problems.
17. Discuss the PHQ9, a recommended depression screening tool for primary care settings.
